

LIFE WADDEN SEA BIRDS, LIFE19 NAT/DK/000922

Future nature managers visit Tønder Municipality to experience the possibilities of implementing Natura 2000 initiatives within the LIFE programme.

On 13 December 2024, a group of 18 graduate students from the Department of Geosciences and Natural Resource Management at the University of Copenhagen visited the LIFE Wadden Sea Birds project.

The purpose was to learn about the projects multifunctional approach to bird protecting measures to pursue Nature 2000 goals and climate adoption. Subjects of interest were e.g., how we cooperate with landowners and managed to purchase the project area, as well as the authorization procedures.

Thanks to Tor Kloyd Albrechtsen and his student for showing the interest and paying Tønder Municipality the visit, that also included a visit to the LIFE Nature project www.raisedbogsindenmark.dk.

[The Department of Geosciences and Natural Resource Management](#) provides knowledge and education to help solve the big societal challenges, such as climate change and increased pressure on natural resources.

6th January 2025, Jørgen Nicolaisen, Project manager, LIFE Wadden Sea Birds
